### Scope of Work:

The Alaska Natural Resources and Outdoor Education Association (ANROE) requests from the Prince William Sound Oil Spill Recovery Institute $24,103.00 to organize and oversee the facilitation of a workshop for science and environmental educators in Anchorage Alaska during April 2001. The goal of this workshop is to plan and begin implementation of a regional education program that will enhance citizen's appreciation for the ecosystems around them and will include a focus on oil pollution.

In this proposal, ANROE assumes the full responsibility to organize and oversee the facilitation of this workshop. This is to be accomplished by:

1. Working with the OSRI steering committee in early March 2001 to develop the workshop agenda, identify participants, and the contents of the invitation packet to be sent to all participants;
2. Making all arrangements for the workshop location and all meeting logistics;
3. Providing qualified workshop facilitators;
4. Preparing a post-workshop proceeding document that includes an executive summary, descriptions of existing programs, and a detailed description of the regional program developed by workshop participants with a timeline and implementation plan.

ANROE is well qualified to organize and oversee the facilitation of a regional environmental education workshop. ANROE has been supporting environmental education efforts in Alaska since the mid 80s.
